Education

- B.Tech CSE, JUET Guna — CGPA: 9.42

Research Internship

Research Intern (Cybersecurity) | IIITDM Jabalpur

May 2026 – Present

- Conducting cybersecurity research under Dr. Nitesh Andola (Assistant Professor, CSE, IIITDM Jabalpur).
- Applying Machine Learning, Deep Learning, Linux, and Computer Networks concepts to security-related problems.
- Performing literature review, experimentation, and implementation of research methodologies.

Skills

- Languages: C++, Java, Python, SQL, HTML, CSS
- Core Concepts: DSA, OOP, Machine Learning, Computer Networks
- Development: Android Development (Java, XML), Flask (Basic)
- Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, OpenCV
- Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Linux (Ubuntu), Virtual Machines, MS-Excel

Projects

Web-Based Chess Game | Flask, Python | [Github](#)

- Developed a Flask-based chess game with move validation and game-state management.
- Implemented legal moves, check, and checkmate detection.

Diabetes Prediction System | Python, Streamlit, Scikit-learn | [GitHub](#)

- Built an SVM-based diabetes prediction model using Python and Scikit-learn.
- Deployed as an interactive Streamlit web application.

ESP Website Contribution | Django, Python | [GitHub](#)

- Contributed to an open-source Django project by fixing bugs and improving navigation.

Line Follower Robot | LEGO EV3

- Developed an autonomous line-following robot using LEGO EV3 sensors.
- Implemented sensor-based path-following control logic.

Data Structures & Algorithms

- Solved 760+ DSA problems across GFG, LeetCode, and Coding Ninjas.
- Strong in Arrays, Strings, Trees, Graphs, and Dynamic Programming.
- Regularly participate in coding challenges on GeeksforGeeks, LeetCode, and Coding Ninjas.

Achievements & Certifications

- Cummins India Scholar
- School Topper, Class XII (91%)
- GeeksforGeeks × NPCI Expert POTD Solver
- Completed GeeksforGeeks 60-Day POTD Challenge
- Dynamic Programming Camp – AlgoUniversity
